INTRODUCTION

This 1970–1974 Cumulative Index to ASCE Publications is a Subject and Name Index to the following ASCE publications:

PROCEEDINGS.–The *Proceedings* of ASCE consist of Journals that are produced under the aegis of the Technical Divisions and the Department of Professional Activities. The Journals are published at different frequencies such as monthly, bimonthly, quarterly, and aperiodic.

CIVIL ENGINEERING.–The official publication of ASCE is its monthly magazine *Civil Engineering–ASCE.*

TRANSACTIONS.–In this index, Volumes 135 through 139 were published. Volumes 135 through 139 contained digests and abstracts of *Proceedings* papers and *Civil Engineering* articles that were published in full in the previous year. Digests are capsule presentations derived from the original papers, discussion, and closures.

MANUALS AND MISCELLANEOUS PUBLICATIONS.–Beginning with Volume 134, *Transactions* also contained digests of material that ASCE published as either a *Manual* or a *Miscellaneous Publication.* Thus these publications are also indexed, by reference to *Transactions.*

Subject Index

The Subject Index terms that are used to describe an article are based on the key words that the authors and editors selected when the paper was published. The key words are based on the Thesaurus of the Engineers Joint Council (1st and 2nd editions), Water Resources Thesaurus of the United States Department of the Interior, and the micro-thesaurus compiled by the Committee on Information Retrieval of the Soil Mechanics and Foundations Division of ASCE. Starting in 1963 ASCE included in its *Journals* and *Civil Engineering,* abstracts and key words of the papers and articles that it published; this was in support of the engineering profession's desire to make its information readily available and retrievable. In addition beginning with 1971, Subject Indexes were included in Miscellaneous Publications, and were then transferred to the annual and cumulative indexes.

Name Index

The Name Index includes references to the authors, co-authors, discussers, co-discussers, and committee chairmen that prepared material that was published. In addition, the Name Index gives citations to the location of the memoir abstract of a deceased member. The Name Index also includes references to individuals, such as ASCE officers, who received significant awards or achieved special status.

The sequence of entries under an author's name in the Name Index is alphabetical for papers and articles of which he was the first-named author. These are followed by discussions of which he was the first-named discusser. The papers and discussions of which he was a co-author are then listed, followed by a reference to the memoir abstract if he passed away during the period covered by the index.

Discussions and Closures

The Name Index can also be used to trace discussions and closures that apply to a particular paper. That is, under the first-named author of a paper, reference will be found to discussions, letters, corrections, and closures that were published following the appearance of the paper or article.

Notation

The notation used in this publication can be explained as follows:

HY5:May 74:621:10549 indicates that the paper was published in the fifth issue of the 1974 *Journal of the Hydraulics Division*; the issue was published in May, 1974. The article appears on page 621 and a copy of the paper can be obtained by requesting Proceedings Paper 10549.

TR:138:604 shows that the Digest appeared in Volume 138 of *Transactions* on page 604.

CE:Mar 73:62 shows that the article appeared in the March 1973 issue of *Civil Engineering* on page 62.

Typical abbreviations used herein are Dsc for discussion, Clo for closure, Rpt for report, Corr for corrections, Err for errata, and Chmn for Chairman of a committee submitting a report.
